AUTHOR INDEX TO VOLUME 5

This index lists, in alphabetical order, the names of authors of all articles, abstracts, letters, and editorials. Full citation is provided under the first author only, with reference made from joint authors. Abstracts, letters, and editorials are distinguished from articles by the following code: A = abstract, L = letter, and E = editorial.

A

Abraham GS, see Dorfman LJ
Adams RN, see Pestronk A
Ahmad BK, see Oh SJ
Albers JW
see Butler BP
see Donofrio PD
see Peterson GW
Albers JW, Zimnowodzki S: Juvenile progressive bulbar palsy: clinical and electrodiagnostic differentiation from bulbar myasthenia gravis, 559-A
Albizzatti MG, see Bassi S
Alvord EC Jr, see Slimp JC
Andrews DF, see Percy ME
Angelini C, Enzi G, Negrin P, Pierobon-Bormioli S, Armani M, Bresolin N: The neuropathy of multiple symmetric lipomatosis: an heretofore unrecognized metabolic neuropathy, S161-A
Ängquist K-A, see Sjöström M
Antoni L, see Stålberg E
Aquilonius S-M, Arvidsson B, Askmark H, Gillberg P-G: Topographical localization of end-plates in cryosections of whole human biceps muscle, 418-L
Argov Z, see Fawcett PRW
Armani M, see Angelini C
Arvidsson B, see Aquilonius S-M
Askmark H, see Aquilonius S-M
Atwood HL, see Silverman H
Auger RG, Daube JR, Gomez MR, Lambert EH: Hereditary form of sustained muscle activity of peripheral nerve origin causing generalized myokymia and muscle stiffness, S106–107-A
Augspach R, see Toyka KV

B

Bacq M, see Telerman-Toppet N
Baker JH, Baldwin KM: Changes in membrane structure following tenotomy of the rat soleus muscle, 222–225
Baldwin KM, see Baker JH
Ball RD, see Butler BP
Ballantyne JP, Hansen S: A quantitative assessment of reinnervation in the polyneuropathies, S127–134
Ballard FJ, Tomas FM: A reply, 86-L
Banker BQ, see Shields RW Jr
Barbieri S, Weiss GM, Daube JR: Fibrillation potentials in myasthenia gravis, S163–164-A
Barchi RL
A mechanistic approach to the myotonic syndromes, S60–63
see Chalikian DM
Barron SA, Kolb D: F responses in amyotrophic lateral sclerosis, 556-A
Bartfeld H
see Kascsak RJ
see Roisen FJ
Bassi S, Albizzati MG, Calloni E, Frattola L: Electromyographic study of diabetic and alcoholic polyneuropathic patients treated with gangliosides, 351–356
Baxter J, see Roisen FJ
Becker MJ, see Eng GD
Beguiristain JL, see Narbona J
Bennett RH, see Roby DS
Benton A, see Jablecki C
Berardelli A
see Hallett M
see Matheson JK
Berenberg W, see Hallett M
Bergfeld J, see Wilbourn A
Bertorini TE, see Bhattacharya SK
Besinger UA, see Toyka KV
Bhattacharya SK, Palmieri GMA, Bertorini TE, Nutting DF: The effects of diltiazem in dystrophic hamsters, 73–78
Bianchi R, Paro M, Ghidotti G, Mussini E: Changes in muscle esterases in genetically dystrophic and control littermate mice, 485–489
Bielawski MA, Hallett M: Motor conduction of ulnar nerve in flexion and extension of elbow in normals and in patients with lesions at the elbow, 565-A
Billeter R, see Schantz P
Bird JWC, see Spanier AM
Bird TD
Inherited peroneal muscular atrophy, 178-L
see Kraft GH
Bjornskov EK, Norris FH Jr, Mower-Kuby J: Histochemical staining of the acetylcholine receptor, acetylcholinesterase, and the axon terminal, 140–142
Blitzer A, see Devi S
Bolton CF, Carter K, Koval JJ: Temperature effects on conduction studies of normal and abnormal nerve, S145–147
Boulu P, Cohen JA, Shahani BT: Autonomic dysfunction in peripheral neuropathies investigated with sympathetic reflex response, 564-A
Bowald S, see Molander H
Boxler K, see Mielke U
Bracale M, see Serra C
Bradley WG: The Vth International Congress on Neuromuscular Diseases, 499-E
Brazis PW, see O'Reilly DF
Brendel K, see Johnson PC
Bresolin N, see Angelini C
Bressler BH, see Jasch LG
Brick JF, Gutmann L: Rattlesnake venom-induced myokymia, S98–100
Brimijoin S, Carlson G, Nguyen Nn, Jakobsen J: Analogues of *p*-bromophenylacetylurea: a structure-activity study of their neurotoxicity in rats, S122–126
Brimijoin S, Schreiber PA: Reduced axonal transport of 10S acetylcholinesterase in dystrophic mice, 405–410
Brooke MH, see Shumate JB
Brown LM, Lopez JR, Olsen JA, Rüdel R, Simmons RM, Taylor SR, Wanek LA: Branched skeletal muscle fibers not associated with dysfunction, 645–653
Bryant SH, see DeCoursey TE
Buchthal F: Spontaneous electrical activity: an overview, S52–59
Buchthal F, Kamieniecka Z: The diagnostic yield of quantified electromyography and quantified muscle biopsy in neuromuscular disorders, 265–280

Burns R, see Yagnik P
Butler BP, Ball RD, Albers JW: Effect of electrode type and position upon motor unit action potential configuration, S95–97
Bylund A-C, see Sjöström M

C

Calloni E, see Bassi S
Canella R, see Norido F
Cappel R, see Davis MH
Cardinet GH III, Leong CL, Means PS: Myofiber differentiation in normal and hypotrophied canine pectineal muscles, 665–673
Carlson G, see Brimijoin S
Carp RI, see Kascsak RJ
Carpenter S, Karpati G: Necrosis of capillaries in denervation atrophy of human skeletal muscle, 250–254
Carpenter S, see Karpati G
Carraro U, Dalla Libera L, Catani C, Danieli-Betto D: Chronic denervation of rat diaphragm: selective maintenance of adult fast myosin heavy chains, 515–524
Carroll JE, see Shumate JB
Carter K, see Bolton CF
Casali C, see Scoppetta C
Catani C, see Carraro U
Ceuterick CM, see Martin J-JR
Chalikian DM, Barchi RL: Sarcolemmal desmosterol accumulation and membrane physical properties in 20,25-diazacholesterol myotonia, 118–124
Charron L, see Peyronnard J-M
Chaudhry U, see Di Benedetto M
Cherington M: Electrophysiologic methods as an aid in the diagnosis of botulism: a review, S28–29
Chokroverty S, Duvoisin RC, Nicklas W: Electrophysiological studies in olivopontocerebellar degeneration, 557-A
Choksi RM, see Shumate JB
Chretien M, see Couraud JY
Codina M, see Salisachs P
Cöers C, see Telerman-Toppet N
Cohen JA, see Boulu P
Con AR, Wrogemann K: Decreased chemiluminescence in thymocytes of dystrophic hamsters, 382–386
Conradi S, Grimby L, Lundemo G: Pathophysiology of fasciculations in ALS as studied by electromyography of single motor units, 202–208
Costello ML, Powell HC, Myers RR: Microgravimetric analysis of nerve edema, 261–264
Couraud JY, Di Giamberardino L, Chretien M, Souyri F, Fardeau M: Acrylamide neuropathy and changes in the axonal transport and muscular content of the molecular forms of acetylcholinesterase, 302–312
Culp WJ, see Ochoa J
Cummins KL, see Dorfman LJ

D

Dajez P, see Telerman-Toppet N
Dalla Libera L, see Carraro U
Danieli-Betto D, see Carraro U
Danner R, see Partanen JV
Daroff RB, see Swift TR
Daube JR
  In honor of Professor Edward H. Lambert, S1-E
  Intraoperative monitoring of spinal cord function, 560-A
  see Auger RG
  see Barbieri S
  see Kelly JJ
  see Kuntz NL
  see Peterson GW
Daube JR, Mulder DW: Prognostic factors in amyotrophic lateral sclerosis, S107-A
Davis MH, Cappel R, Vester JW, Samaha FJ, Gruenstein E: Creatine kinase activity in normal and Duchenne muscular dystrophy fibroblasts, 1–6
DeCoursey TE, Bryant SH, Lipicky RJ: Sodium currents in human skeletal muscle fibers, 614–618
Devi S, Lovelace RE, Blitzer A: Electrodiagnosis of laryngeal muscles, 554-A
Dhoot GK, Perry SV: Changes in the forms of the components of the troponin complex during regeneration of injured skeletal muscle, 39–47
Di Benedetto M, Chaudhry U, Markey K: Proximal nerve conduction: brachial plexus, 564-A
Di Giamberardino L, see Couraud JY
Domke R, see Feit H
Donnenfeld H
  see Kascsak RJ
  see Roisen FJ
Donofrio PD, Albers JW, Greenberg HS, Mitchell BS: Peripheral neuropathy in osteosclerotic myeloma: clinical and electrodiagnostic improvement with chemotherapy, 561-A
Dorfman LJ, Cummins KL, Abraham GS: Conduction velocity distributions of the human median nerve: comparison of methods, S148–153
do Valle JR, see Souccar C
Drachman DB
  see Pestronk A
  see Stewart PM
  see Swift TR
Dubowitz V:
  Reply, 179-L
  see Scott OM
Duhamel RC, see Johnson PC
Dulhunty A, Valois A: A freeze-fracture study of normal and dystrophic C57BL mouse muscle, 425–433
Duvoisin RC, see Chokroverty S
Dyck PJ
  see Kuntz NL
  see Low PA

E

Edström L, Wróblewski R, Mair WGP: Genuine myotubular myopathy, 604–613
Edwards RHT
  see Jackson MJ
  see Rennie MJ
Egloff-Baer S, see Roth G
Eguren LA, see Stumpf DA
Eilert RE, see Stumpf DA
Eisen A: Failure of peripheral nerve to attain supernormal excitability in patients with multiple sclerosis, S162-A
Eisen A, Paty D, Hoirch M: Altered supernormality in multiple sclerosis peripheral nerve, 411–414
Elmqvist D, Toremalm NG, Elner Å, Mercke U: Hemifacial spasm: electrophysiological findings and the therapeutic effect of facial nerve block, S89–94
Elner Å, see Elmqvist D
Emery AEH, see Holloway SM
Emser W, see Mielke U
Eng GD, Becker MJ: Electrodiagnostic tests in detection of malignant hyperthermia, 555-A
Engel AG, see Fukunaga H
Engel AG, Fukunaga H, Osame M: Stereometric estimation of the area of freeze-fractured presynaptic membrane, 682–685
Engel AG, Fukunaga H, Osame M, Lambert EH: Three-dimensional topographic analysis of the presynaptic membrane in the Lambert-Eaton myasthenic syndrome (LEMS), S50–51-A
Engkvist O, see Molander H
Entrikin RK, Patterson GT, Wilson BW: Drug evaluation in muscular dystrophy of the chicken, 321–327
Entrikin RK, Randall WR, Wilson BW: Myotonic electromyographic activity in complexus muscles of normal and dystrophic chicks, 396–398
Enzi G, see Angelini C
Eriksson I, see Molander H
Erlandson RF, Joynt RL: Simulation studies of the effect of motor unit recruitment on the Fourier Transform of EMGs, 560-A
Erlandson RF, Tenebaum J: A program for the analysis and simulation of signals and its use in EMG analysis, 561-A
Eron J, see Shinnar M
Evans OB, see Mrak RE

F

Fakadej AV, Gutmann L: Prolongation of post-tetanic facilitation in infant botulism, 727–729
Fairbanks V, see Lennon VA
Fardeau M, see Couraud JY
Fassotte A, see Telerman-Toppet N
Fatehi M, see Wiechers D
Faulkner JA, see White TP
Fawcett PRW, McLachlan SM, Nicholson LVB, Argov Z, Mastaglia FL: D-penicillamine-associated myasthenia gravis: immunological and electrophysiological studies, 328–334
Feit H, Stauver M, Domke R, Shay JW: Fragmentation analysis of normal and dystrophic avian muscle, 373–381
Feit H, Tindall RSA, Glasberg M: Sources of error in the diagnosis of Guillain-Barre syndrome, 111–117
Fernandez HL, see Inestrosa NC
Findley LJ, see Salisachs P

Fisher MA
Evoked motor response durations—a sensitive electrophysiological parameter, 565-A
F response latency determination, 730–734
Flagstad A, see Trojaborg W
Fleischer S, see Mrak RE
Foote RA, Kimbrough SM, Stevens JC: Lupus myositis, 65–68
Forbes MS, Sperelakis N: Bridging junctional processes in couplings of striated and smooth muscle cells, 674–681
Frattola L, see Bassi S
Fridén J, see Sjöström M
Frost AP, see Hartwig GB
Fukunaga H, see Engel AG
Fukunaga H, Engel AG, Osame M, Lambert EH: Paucity and disorganization of presynaptic membrane active zones in the Lambert-Eaton myasthenic syndrome, 686–697

G

Gardiner PF, Lapointe M, Gravel D: Exercise effects on recovery of muscle acetylcholinesterase from reduced neuromuscular activity, 363–368
Ghidotti G, see Bianchi R
Gillberg P-G, see Aquilonius S-M
Gilliatt RW: Electrophysiology of peripheral neuropathies—an overview, S108–116
Glasberg M, see Feit H
Glassi G, see Saito T
Goddard C, see Scott OM
Goldspink G, see Nwoye LO
Gomez MR, see Auger RG
Gorio A, see Norido F
Goto I, see Limos LC
Grabensee B, Toyka KV
Gravel D, see Gardiner PF
Greenberg HS, see Donofrio PD
Greenberg MK, Swift TR: Ethylene oxide peripheral neuropathy: four-year follow-up, 557-A
Grimby L, see Conradi S
Gruenstein E, see Davis MH
Grunnet ML, see Lewis RA
Gunther JS, Letinsky MS: A preparation for studying dystrophic avian muscle and neuromuscular junctions, 7–13
Gustavsson L, see Sjöström M
Gutmann L
see Brick JF
see Fakadej AV
Gwilt M, see Newson-Davis J

H

Haas R, see Stumpf DA
Hallett M
see Bielawski MA
see Matheson JK
see Shinnar M
Hallett M, Berardelli A, Sabra AF, Berenberg W, Simon SR: Stretch reflexes of triceps surae in patients with upper motor neuron syndrome, 558-A
Hanada K, see Sugita H
Haneveld F, see Toyka KV
Hansen S, see Ballantyne JP
Hanson M, see Wilbourn A
Hardy R, see Wilbourn A
Harrington H, see Shinnar M
Hartwig GB, Miller SE, Frost AP, Roses AD: Myotonic muscular dystrophy: morphology, histochemistry, and growth characteristics of cultured skin fibroblasts, 125–130

Kennedy WR, Sakuta M: Sweat gland function in diabetic neuropathy, 565-A
Khatri BO, Luprecht G, Weiss SA: Plasmapheresis and immunosuppressive drug therapy in polymyositis, 568-L
Kidd PM, Yasumura T: T system abnormalities in differentiating skeletal fibers of dystrophic chickens, 471–478
Kim HS, see Oh SJ
Kimbrough SM, see Foote RA
Kimura J
Conduction abnormalities of the facial and trigeminal nerves in polyneuropathy, S139–144
see Zellweger H
Kimura M, see Sugita H
Kojima N, see Limos LC
Kolb D, see Barron SA
Konishi T, Nishitani H, Motomura S: Single fiber electromyography in chronic renal failure, 458–461
Konishi T, Saida K, Ohnishi A, Nishitani H: Perineuritis in mononeuritis multiplex with cryoglobulinemia, 173–177
Kopec J, see Middleton L
Koval JJ, see Bolton CF
Kraft GH, see Slimp JC
Kraft GH, Bird TD: Nerve conduction velocities in children with Charcot-Marie-Tooth disease, 567-A
Kumagai K, see Nonaka I
Kuntz NL, Daube JR: Electrophysiologic profile of childhood spinal muscular atrophy, S106-A
Kuntz NL, Daube JR, Dyck PJ: So-

matosensory evoked potentials in congenital sensory neuropathy, 560-A
Kurg T, Stinson RH, Millman BM: X-ray diffraction from striated muscles and nerves in normal and dystrophic mice, 238–246
Kuroiwa Y, see Limos LC

L

Lambert EH
see Auger RG
see Engel AG
see Fukunaga H
see Lennon VA
Lambert EH, Lennon VA: Neuromuscular transmission in nude mice bearing oat cell tumors from Lambert-Eaton myasthenic syndrome, S39–45
Lang B, see Newsom-Davis J
Lapa AJ, see Souccar C
Lapointe M, see Gardiner PF
Latov N, see Saito T
La Torre P, see Salisachs P
Law PK: Beneficial effects of transplanting normal limb-bud mesenchyme into dystrophic mouse muscles, 619–627
Leiska NG, see Romero-Herrera AE
Lennon VA
see Kelly JJ
see Lambert EH
see Swift TR
Lennon VA, Lambert EH, Whittingham S, Fairbanks V: Autoimmunity in the Lambert-Eaton myasthenic syndrome, S21–25
Leong CL, see Cardinet GH III
LeQuesne PM, see Takahashi M
Lesser M, see Wilbourn A
Letinsky MS, see Gunther JS
Lewis RA, Grunnet ML, Zimmerman AW: Peripheral nerve demyelination in Cockayne's syndrome, 557-A
Leibert UG, see Toyka KV
Limos LC, Ohnishi A, Suzuki N, Kojima N, Yoshimura T, Goto I, Kuroiwa Y: Axonal degeneration and focal muscle fiber necrosis in human thallotoxicosis—histopathological studies of nerve and muscle, 698–706
Lin JT: EMG in Emery-Dreifuss syndrome, 562-A
Lin JTY, see Singer PA
Lipicky RJ, see DeCoursey TE
Livett BG, see Mizobe F
Lopez JR, see Brown LM
Lovelace RE
Experimental diabetic neuropathy: pathophysiology and reversal, S161–162-A
see Devi S
see Middleton L
see Saito T
Low PA: Nerve microenvironment in peripheral neuropathies, S163-A
Low PA, Dyck PJ, Schmelzer JD: Chronic elevation of endoneurial fluid pressure is associated with low-grade fiber pathology, 162–165
Lowitzsch K, see Hopf HC
Ludy J-P, see Roth G
Lundemo G, see Conradi S
Luprecht G, see Khatri BO

M

Mair WGP, see Edström L
Markey K, see Di Benedetto M
Markley JM, see White TP
Martin J-JR, Ceuterick CM, Mercelis RJ: Nuclear inclusions in oculopharyngeal muscular dystrophy, 735–737
Martínez-Lage JM
see Narbona J
see Salisachs P
Mastaglia FL, see Fawcett PRW
Matheson JK, Berardelli A, Weinhaus R, Hallett M: EMG relationships of agonist and antagonist muscles following voluntary movement, 558-A
Maxwell LC, see White TP
Mayer RF: Neuromuscular transmission in single motor units in myasthenia gravis, S46–49
McLachlan SM, see Fawcett PRW
Means PS, see Cardinet GH III
Meezan E, see Johnson PC
Mercelis RJ, see Martin J-JR
Mercke U, see Elmqvist D
Mestre M, see Narbona J
Metral S
see Hort-Legrand C
see Sumner AJ

SUBJECT INDEX TO VOLUME 5

This index gives the first author (in parentheses) and first page of the article, abstract, letter, or editorial in which the indexed subject occurs. The reader is referred to the author index for the full title and coauthors, where appropriate, of the piece. Abstracts, letters, and editorials are distinguished from articles by the following code: A = abstract, L = letter, E = editorial.

A

Acetylcholine receptor
  histochemical staining (Bjornskov) 140
Acetylcholinesterase
  in acrylamide neuropathy (Couraud) 302
  histochemical staining (Bjornskov) 140
  neuromuscular activity (Gardiner) 363
  reduced axonal transport in murine muscular dystrophy (Brimijoin) 405
Amyotrophic lateral sclerosis
  electrophysiological studies (Ballantyne) S127
  fasciculations (Conradi) 202
  F responses (Barron) 556–A
  hemiplegic (O'Reilly) 724
  macro electromyography (Sanders) 556–A
  neuron specific cytotoxicity of sera (Roisen) 48
  prognostic factors (Daube) S107-A
  virological studies (Kascsak) 93

B

Bell's palsy
  treatment by temporalis muscle transplant (White) 500
Book reviews
  Advances in Biophysics (Kotani) 258
  Biochemistry, Biophysics and Regulation of Cytochrome P-450 (Gustafsson, Carlstedt-Duke, Mode, and Rafter) 182
  Biomechanics of Musculoskeletal Injury (Gonza and Harrington) 419
  Calcium and cAMP as Synarchic Messengers (Rasmussen) 570
  Chronic Pain: Psychosocial Factors in Rehabilitation (Roy and Tunks) 422
  Clinical Neurophysiology (Stålberg and Young) 346
  Current Neurology, Volume 3 (Appel) 259
  Demyelinating Diseases: Basic and Clinical Electrophysiology (Waxman and Ritchie) 420
  Development and Specialization of Skeletal Muscle (Goldspink) 257
  Difficult Problems in Hand Surgery (Strickland and Steichen) 755
  Electrodiagnosis in Clinical Neurology (Aminoff) 89
  Evaluation of Sensibility and Re-education of Sensation in the Hand (Dellon) 88
  The Facial Palsies: Their Physiopathology and Therapeutic Approaches (Moldaver and Conley) 345
  Glial-Neurone Interactions (Treherne) 496
  Human Muscle Fatigue: Physiological Mechanisms (Edwards) 757
  Membrane Transport and Neuroreceptors (Oxender, Blume, Diamond, and Fox) 571
  Mitochondria and Muscular Diseases (Busch, Jennekens, and Scholte) 421
  Molecular Neurobiology (Guroff) 257
  Monoclonal Antibodies. Hybridomas: A New Dimension in Biological Analyses (Kennett, McKearn, and Bechtol) 419
  Monoclonal Antibodies to Neural Antigens (McKay, Raff, and Reichardt) 420
  Motor Unit Types, Recruitment and Plasticity in Health and Disease (Desmedt) 346
  Nerve Conduction Studies (Hammer) 347
  Nerve and Muscle (Keynes and Aidley) 345
  Nerve and Muscle: Membranes, Cells, and Systems (Stein) 88
  The Nervous System, Volume II, Motor Control, Parts 1 and 2 (Brooks) 348
  Neuroactive Peptides (Burgen, Kosterlitz, and Iversen) 570
  Neurochemistry and Clinical Neurology (Battistin, Hashim, and Lajtha) 88
  The Neurocristopathies (Kissel, André, and Jacquier) 258
  Neurotransmission, Neurotransmitters and Neuromodulators (Kravitz and Treherne) 755
  New Approaches to Nerve and Muscle Disorders: Basic and Applied Contributions (Kidman, Tomkins, and Westerman) 348
  Orthotics Etcetera, Second Edition (Redford) 182
  Osteoarthromechanics (Ghista) 495
  Plasticity of Muscle (Pette) 183
  Principles of Neural Science (Kandel and Schwartz) 496
  Progress in Anatomy, Volume 2 (Harrison and Navaratnam) 757
  Recent Advances in Clinical Neurology, Number 3 (Matthews and Glaser) 495
  Respiratory Dysfunction in Neurologic Disease (Weiner) 89
  Skeletal Muscle Pharmacology: Glossary of Muscle Constituents and Chemical Research Tools, with Reference to Muscle Physiology and Neuromuscular Disorders (Walter) 421
  Therapy for Neurologic Disorders (Wiederholt) 755
  Tissue Fluid Pressure and Composition (Hargens) 422
Botulism
  electrophysiological studies (Cherington) S28
  electrophysiological studies in infantile botulism (Fakadej) 727
  infantile and neuromuscular transmission (Pickett) S26
Bulbar palsy
  juvenile progressive form electrophysiology (Albers) 559–A
Bupivacaine
  protein synthesis in muscle (Jones) 281

C

Carnitine
  palmitate oxidation (Shumate) 226
Carnitine palmityl transferase
  palmitate oxidation (Shumate) 226
Carpal tunnel syndrome
  conduction study (Joynt) 566–A
  decremental response (Singer) 566–A

Charcot-Marie-Tooth disease
nerve conduction in children (Kraft) 567-A
Roussy Lévy Syndrome (Salisachs) 663
Cockayne's syndrome
demyelinating neuropathy (Lewis) 557–A
Creatine kinase
Duchenne muscular dystrophy carriers (Percy) 58
Duchenne muscular dystrophy fibroblasts (Davis) 1
fibroblasts (Davis)1

D

Dermatomyositis (see Polymyositis)
Desmosterol
sarcolemmal in 20,25-diazacholesterol myotonia (Chalikian) 118
D-penicillamine
myasthenia gravis (Fawcett) 328
Dystrophia myotonica (see Muscular dystrophy—myotonic)

E

Electromyography
amyotrophic lateral sclerosis macro EMG findings (Sanders) 556–A
antagonist muscles following movement (Matheson) 558–A
children and quantitation (Smyth) S107-A
computer simulation (Erlandson) 560–A
computerized analysis (Middleton) 561–A
computerized analysis and simulation of signals (Erlandson) 561–A
correlation with muscle biopsy (Buchthal) 265
denervation conditions (Shinnar) 554–A
Fourier transform (Erlandson) 560–A
Guillain-Barré syndrome (Peterson) 556–A
increased insertional type activity (Wilbourn) S101
laryngeal muscles (Devi) 554–A
macro electromyography (Stålberg) S135
malignant hyperthermia (Eng) 555–A
in multiple sclerosis (Petajan) S157
nerve injury related to sport (Wilbourn) 554–A
quantitative interference pattern in myasthenia gravis (Yaar) 559–A
scanning (Stålberg) 555-A
spontaneous electrical activity (Buchthal) S52
stretch reflexes of triceps surae (Hallett) 558–A
thoracic outlet syndrome (Wilbourn) 558–A
Electromyography—single fiber
in chronic renal failure (Konishi) 458
in chronic spinal muscular atrophy (Shields) 563–A
diagnosis of myasthenia gravis (Kelly) S164-A
jitter studies in myasthenia gravis (Sanders) S164-A
in limb girdle muscular dystrophy (Shields) 563–A
in myasthenia gravis (Hilton-Brown) 215
in myasthenic syndrome (Phillips) 555–A
in Schwartz-Jampel syndrome (Jablecki) 555–A; S64
Electron probe x-ray microanalysis
myotubular myopathy (Edström) 604
Electrophysiological studies
evoked motor response durations in neuropathy (Fisher) 565–A
infantile botulism (Fakadej) 727
E. H. Lambert's contributions (Kaeser) S165; (Willison) S2
neuropathies (Gilliatt) S108
Evoked potentials
cortical in experimental allergic encephalitis (Slimp) 560–A
somatosensory cerebral evoked potentials in hemiplegia (Serra) 559–A
somatosensory evoked potentials in congenital sensory neuropathy (Kuntz) 560–A
somatosensory evoked potentials in spinal cord surgery (Daube) 560–A

F

Fasciculations
amyotrophic lateral sclerosis (Conradi) 202
F response
mean latency determination (Fisher) 730
variable (Shahani) S163-A
F waves
amyotrophic lateral sclerosis (Barron) 556–A

G

Gangliosides
rat diaphragm (Inestrosa) 33
treatment of diabetic and alcoholic neuropathy (Bassi) 351
treatment of diabetic mice (Norido) 107
Gluteal compartment syndrome (Wilbourn) 558–A
Guillain-Barré syndrome
serum factor (Sumner) S163-A

H

Hemifacial spasm
electrophysiological localization (Hopf) S84
electrophysiological studies (Elmqvist) S89
treatment by phenol neurolysis (Elmqvist) S89

M

Malignant hyperthermia
electromyography (Eng) 555–A
3-Methylhistidine
corticosteroid myopathy and Duchenne muscular dystrophy (Ballard) 86–L; (Rennie) 85–L, 178–L
Motor neuron
axonal transport to mark sural motor neurons (Peyronnard) 654
Motor neuron disease
epidemiology in Scotland (Holloway) 131
Motor units
action potential configuration and electrode type (Butler) S95
recruitment and computer simulation (Erlandson) 560–A
Multiple sclerosis
EMG findings (Petajan) S157
peripheral nerve supernormality (Eisen) 411
supernormal excitability in peripheral nerve (Eisen) S162-A
Muscle
aging and regeneration (Zacks) 152
autophagic degradation (Mrak) 754
canine pectineal (Cardinet) 665
capillaries in denervation (Carpenter) 250
carnitine palmityl transferase and carnitine (Shumate) 226
cathepsin B inhibitors (Spanier) 313
couplings (Forbes) 674
denervation and reinnervation (Ballantyne) S127
denervation and reinnervation in macro electromyography (Stålberg) S135
electron probe x-ray microanalysis in myotubular myopathy (Edström) 604
esterases in mice (Bianchi) 485
fascial inflammation (Simon) 525
function of muscle in children with Duchenne muscular dystrophy (Johnson) 754-L; (Scott) 291
granuloma after intramuscular injection (Mrak) 637
hypertrophy following S_1 radiculopathy (Mielke) 434
myofibrillar protein degradation (Ballard) 86–L; (Rennie) 85–L, 178–L
myofibrillar protein degradation (Stracher) 494-L
oxidative enzymes in denervation (Nemeth) 135
palmitate oxidation (Shumate) 226
protein degradation in Duchenne muscular dystrophy (Stewart) 197
proteins in dystrophic mouse muscle (Jasch) 462
protonmotive force (Stumpf) 14
sodium currents in human muscle fibers (DeCoursey) 614
target fibers (Mrak) 745
thallium intoxication (Limos) 698
training and fiber types (Schantz) 628
triad ultrastructure (Forbes) 674
tropomyosin (Romero-Herrera) 707
tropomyosin heterogeneity (Romero-Herrera) 713
troponin C (Romero-Herrera) 707
T-system in avian muscular dystrophy (Sugita) 738
x-ray diffraction in murine muscular dystrophy (Kurg) 238

Muscle biopsy
correlation with electromyography (Buchthal) 265
Muscle—cardiac
triad regions (Forbes) 674
Muscle denervation
capillary necrosis (Carpenter) 250
electrical and oxidative enzymes (Nemeth) 135
electromyography (Shinnar) 554–A
myosin changes (Carraro) 515
sialic acid changes (Inestrosa) 33
Muscle disuse
acetylcholinesterase (Gardiner) 363
Muscle exercise
acetylcholinesterase (Gardiner) 363
Muscle fibers
autophagic multivesicular bodies in target fibers (Mrak) 745
branched (Brown) 645
sodium currents in human muscle (DeCoursey) 614
splitting (Brown) 645
Muscle fiber types
canine pectineal (Cardinet) 665
effects of training (Schantz) 628
morphometry in humans (Sjöström) 538
Muscle histochemistry
muscular dystrophy (Nonaka) 102
Muscle—levator ani
testosterone and neuromuscular transmission (Souccar) 232
Muscle mitochondria
in murine mouse dystrophy (Silverman) 640
Muscle neuromuscular junction
human biceps (Aquilonius) 418–L
Muscle pains
electrophysiological studies (Valli) S106-A
Muscle physiology
isometric contraction in muscular dystrophy (Nwoye) 69
Muscle regeneration
age effects (Zacks) 153
troponin complex (Dhoot) 39
Muscle sarcolemma
in murine muscular dystrophy (Dulhunty) 425
Muscle—smooth
triad regions (Forbes) 674
Muscle transplantation
embryonic muscle in muscular dystrophy (Law) 619
Muscular dystrophy
axonal transport of AChE reduced in mouse (Brimijoin) 405
congenital muscular dystrophy, Fukuyama type (Nonaka) 102
embryonic muscle transplantation (Law) 619
Emery-Dreifuss syndrome electromyography (Lin) 562–A
mitochondria in hamster myopathy (Proschek) 26
oculopharyngeal-nuclear inclusions (Martin) 735
treatment with parenteral amino acids (Hudecki) 447
tropomyosin (Romero-Herrera) 707
troponin C (Romero-Herrera) 707
Muscular dystrophy—avian
electromyographic myotonia (Entrikin) 396
fragmentation analysis (Feit) 373
myosin light chain-1 allelic forms (Rushbrook) 505
neuromuscular preparation (Gunther) 7
therapeutic trial with thiol protease inhibitor (Sugita) 738
treatment (Entrikin) 321
treatment with parenteral amino acids (Hudecki) 447
T-system abnormalities (Kidd) 471
Muscular dystrophy—Duchenne
creatine kinase activity in fibroblasts (Davis) 1
creatine kinase in carriers (Percy) 58
membrane myopathy model (Pestronk) 209
muscle function in children (Johnson) 754-L; (Scott) 291–L
muscle protein degradation (Stewart) 197
myosin light chains (Takagi) 399
scoliosis (Siegel) 417–L
spinal stabilization (Siegel) 417–L
Muscular dystrophy—Duchenne—treatment
with branched-chain ketoacids (Stewart) 197
Muscular dystrophy—hamster
heart in the hamster (Jasmin) 20
membrane chemiluminescence in thymyocytes (Con) 383
prevention of muscle cell necrosis by paraplegia (Karpati) 369
treatment with diltiazem (Bhattacharya) 73
Muscular dystrophy—limb girdle
single fiber electromyography (Shields) 563–A
Muscular dystrophy—murine
esterases in mice (Bianchi) 485
isometric contraction in fast and slow muscles (Nwoye) 69
membrane defects in platelets of mice (Mizobe) 387
mitochondrial increase with age (Silverman) 640
proteins in dystrophic mouse muscle (Jasch) 462
sarcolemma of mouse (Dulhunty) 425
sarcoplasmic reticulum (Mrak) 143
sarcoplasmic reticulum lipids in mice (Mrak) 439
x-ray diffraction in mice (Kurg) 238
Muscular dystrophy—myotonic
exercise tests (Streib) 563–A
skin fibroblasts (Hartwig) 125
Muscular dystrophy—treatment (Entrikin) 321
diltiazem in hamsters (Bhattacharya) 73
with proteinase inhibitors (Stracher) 494-L
Myasthenia—congenital
in dogs (Trojaborg) S30
Myasthenia gravis
conference notes (Swift) 415
diagnosis by electromyography (Yaar) 559–A
diagnostic tests (Kelly) S164-A
D-penicillamine-induced (Fawcett) 328
electrophysiological studies and bulbar form (Albers) 559–A
fibrillation potentials (Barbieri) S163-A
E. H. Lambert's contributions (Simpson) S6
muscle temperature effect on neuromuscular transmission (Jablecki) 491–L
reinnervation (Hilton-Brown) 215
single fiber EMG (Hilton-Brown) 215
single fiber EMG, jitter studies (Sanders) S164-A
single motor unit decrement (Mayer) S46
Myasthenia gravis—congenital
acetylcholine receptor (Scopetta) 493–L; (Vincent) 493–L
Myasthenia gravis—experimental autoimmune
treatment with cyclophosphamide (Pestronk) 79
Myasthenic syndrome
autoimmunity (Lennon) S21
E. H. Lambert's contributions (Simpson) S6
morphometry of neuromuscular junction (Engel) S50–A; (Fukunaga) 686
serum factor (Newsom-Davis) S17
single fiber electromyography (Phillips) 555–A
treatment by plasmapheresis (Newsom-Davis) S17
Myasthenic syndrome—experimental
mice with oat cell tumor (Lambert) S39
Myokymia
hereditary (Auger) S106-A
rattlesnake venom-induced (Brick) S98
Myopathy
bupivacaine effect on protein synthesis (Jones) 281
hamster (Jasmin) 20
hamster mitochondrial (Proschek) 26
myotubular (Edström) 604
sarcolemmal disruption (Pestronk) 209
zinc excretion (Jackson) 661-L
Myopathy—vitamin E deficiency
cathepsin B inhibitors (Spanier) 313
Myosin
denervated rat diaphragm (Carraro) 515
light chain-1 in chickens (Rushbrook) 505
Myosin—light chains
in Duchenne muscular dystrophy (Entrikin) 399
Myositis
experimental allergic (Whitaker) 573
Myotonia
in avian muscular dystrophy (Entrikin) 396
20,25-diazacholesterol (Chalikian) 118
pathogenesis (Barchi) S60
recessive electromyography in carriers (Streib) 179–L; (Zellweger) 180–L
Myotonic syndromes
transient paresis and electrophysiological changes (Streib) 719

N

Nerve
effect of pyrethroids (Takahashi) S162-A
endoneurial fluid in peripheral neuropathies (Low) S163-A
endoneurial fluid pressure (Low) 162
extracellular matrix preparation (Johnson) 335
F-response (Shahani) S163-A
intraneural microelectrode recording of abnormal spontaneous activity (Ochoa) S74
refractory period (Petajan) 564–A; (Reitter) 593
regeneration through a polyglactin tube (Molander) 54
Nerve axonal transport
AChE in mouse muscular dystrophy (Brimijoin) 405
Nerve conduction
brachial plexus (DiBenedetto) 564–A
block (Olney) 566–A
Charcot-Marie-Tooth disease (Kraft) 567–A
Cockayne's syndrome (Lewis) 557–A
computerized analysis (Wiechers) 561–A
facial and trigeminal nerves in neuropathy (Kimura) S139
ischemia effects on rat tail nerve (Nielsen) 567–A
olivopontocerebellar degeneration (Chokroverty) 557–A
reaction to paired stimuli in polyneuropathies (Reitter) 593
sensory in the diagnosis of interdigital neuropathy of the foot (Oh) 566–A
temperature effects (Bolton) S145
velocity spectrum methods (Dorfman) S148
Nerve conduction—diabetic
ganglioside treatment in mice (Norido) 107
Nerve edema
microgravimetric analysis (Costello) 261
Nerve entrapment
interdigital (Oh) 566–A
median proximal lesions (Roth) 247
Nerve median
entrapment (Singer) 566–A
Nerve physiology
supernormal excitability in peripheral nerve (Eisen) S162
supernormality altered in multiple sclerosis (Eisen) 411
Nerve sensory
abnormal spontaneous activity (Ochoa) S74
Nerve sural—motor
origin in the rat (Peyronnard) 654
Nerve ulnar
conduction across elbow (Bielawski) 565–A
Neurofilaments
giant axonal neuropathy (Pena) 166
Neuromuscular junction
histochemistry of acetylcholine receptor and acetylcholinesterase (Bjornskov) 140
morphometric technique (Engel) 682
Neuromuscular junction—morphometry
Lambert-Eaton syndrome (Fukunaga) 686
Neuromuscular transmission
botulism (Cherington) S28
facilitation of two types in frog (Hort-Legrand) 357
infant botulism (Fakadej) 727; (Pickett) S26
influence of testosterone (Souccar) 233
oat cell tumor in mice (Lambert) S39
thalium intoxication (Limos) 698
transmitter release of two types (Thesleff) S12
Neuropathy
acrylamide, axonal transport of AChE (Couradu) 302
alcoholic, treatment with gangliosides (Bassi) 351
autonomic function (Boulu) 564–A
autonomic function, sweat glands (Kennedy) 565–A
Charcot-Marie-Tooth disease (see Neuropathy-peroneal muscular atrophy)
childhood (Jones) S161-A
chronic inflammatory, plasma exchange (Toyka) 479
Cockayne's syndrome (Lewis) 557–A
conduction block in ulnar nerve entrapment (Miller) S154
congenital sensory neuropathy and evoked potentials (Kuntz) 560–A
cryoglobulinemia, perineuritis and mononeuritis multiplex (Konishi) 173
diabetic, experimental (Lovelace) S161-A
diabetic, treatment with gangliosides (Bassi) 351
diabetic, treatment with gangliosides in mice (Norido) 107
distal axonopathy, centripetal and centrifugal fibers (Thomas) S117
electrophysiological studies (Ballantyne) S127
electrophysiological studies (Gilliatt) S108
endoneurial fluid constituents (Low) 162
endoneurial fluid pressure (Low) 162
ethylene oxide (Greenberg) 557–A
evoked motor response durations (Fisher) 565–A
facial, treatment by temporalis muscle transplant (White) 500
facial, trigeminal nerve conduction (Kimura) S139
galactose and endoneurial fluid pressure (Low) 162
gammopathy, electrophysical studies (Saito) 562–A
giant axonal, intermediate filament defect (Pena) 166
Guillain-Barré syndrome, electromyography (Peterson) 556–A
Guillain-Barré syndrome, errors in diagnosis (Feit) 111
Guillain-Barré syndrome, nerve conduction (Reitter) 593
Guillan-Barré syndrome, serum factor (Sumner) S163-A
hexachlorophene, microgravimetric analysis of nerve edema (Costello) 261
hypophosphatemia in hyperalimentation (Yagnik) 562–A
inflammatory, corticosteroid treatment in demyelinating neuropathy (Oh) 562–A
multiple symmetric lipomatosis (Angelini) S161-A
myeloma-osteosclerotic (Donofrio) 561–A
nerve conduction variability in Refsum's disease (Salisachs) 255–L
p-bromophenylacetylurea analogues (Brimijoin) S122
perineuritis in cryoglobulinemia (Konishi) 173
peroneal muscular atrophy (Bird) 178–L; (Dubowitz) 179–L
peroneal muscular atrophy, variable nerve biopsy in a kinship (Van Weerden) 185
radiation induced spontaneous activity (Stöhr) S78
Refsum's disease (Salisachs) 255–L
sciatic and gluteal mononeuropathies with hematoma (Wilbourn) 558–A
sweat gland function in diabetes (Kennedy) 565–A
sympathetic reflex response (Boulu) 564–A
thallium intoxication (Limos) 698
thallium poisoning (Roby) 557–A
uremic, single fiber EMG (Konishi) 458
vincristine and nerve conduction (Reitter) 593

P

p-Bromophenylacetylurea
neurotoxicity (Brimijoin) S122
Roussy-Lévy Syndrome (Salisachs) 663-L
Peroneal muscular atrophy
nerve conduction in children (Kraft) 567–A
Physiology
neuromuscular in avian muscular dystrophy (Gunther) 7
Plasmapheresis
chronic inflammatory neuropathy (Toyka) 479
polymyositis (Khatri) 568–L
Polymyositis
benign monoclonal gammopathy (Telerman-Toppet) 490–L
etiology and pathogenesis (Whitaker) 573
fasciitis (Simon) 525
systemic lupus erythematosus (Foote) 65
treatment by plasmapheresis and immunosuppressive drugs (Khatri) 568–L

R

Radiculopathy
sacral with calf hypertrophy (Mielke) 434
Roussy-Lévy Syndrome
historical follow-up (Salisachs) 663-L

S

Sarcolemma
changes after tenotomy (Baker) 222
Sarcoplasmic reticulum
lipid composition in dystrophic mice (Mrak) 439
murine muscular dystrophy (Mrak) 143
Schwartz-Jampel syndrome
electromyography (Jablecki) 555–A
Spinal cord atrophy
intramedullary telangiectasia (Narbona) 256–L
Spinal muscular atrophy
electrophysiological studies (Kuntz) S106-A
single fiber electromyography (Shields) 563–A
Stiff-man syndrome
hereditary (Auger) S106-A
Sweat glands
innervation (Sakuta) 565–A

T

Tenotomy
sarcolemmal intramembrane particles (Baker) 222
Thoracic outlet syndrome
electrophysiology (Wilbourn) 558–A
Troponin
regeneration of injured skeletal muscle (Dhoot) 39
Troponin C (tropomyosin)
fetal, adult and dystrophic muscle (Romero-Herrera) 707

V

Vimentin
giant axonal neuropathy (Pena) 166
